CST1510

CST1510 — Coursework 1 (CW1) specification

CW1 covers Weeks 1–7 and contributes **50% of the module mark**.

What you submit

Each week, everything goes in that week's `LAB` folder. Submit the following for **each of Weeks 1–7**:

1. **Completed lab notebook** — with the warm-up fixes and drills completed: `Week 0N .../LAB/W0N_Lab.ipynb`.
2. **Weekly mini-project** — the `.py` file produced from that week's `LAB/template.py`.
3. **Cheat Sheet photo** — a photo of your Cheat Sheet showing that week's new box, pasted into the Journal cell at the end of the lab notebook. By Week 7 it shows Boxes 1–7.

The rest of your journal (diagram, concepts, errors) stays on paper and is not submitted.

Push your work to GitHub at the end of every lab.

Tiers

The relevant weekly README defines each tier in detail.

Tier	What you complete
Threshold	Warm-up, Drills 1–3, and the Threshold mini-project
Typical	Threshold, plus Drills 4–6 and the Typical mini-project
Excellent	Typical, plus Drill 7 and the Excellent mini-project

Marking criteria

Criterion	Weight	What is assessed
Python knowledge and application	35%	Correct use of the concepts taught in Weeks 1–7, including values and types, decisions and loops, functions, data structures, files, classes, pandas, and string handling
Working mini-projects	25%	Functional weekly `.py` projects that meet the selected Threshold, Typical, or Excellent standard
Problem solving and debugging	15%	Ability to interpret errors, correct broken code, validate results, and make sensible technical decisions
Code quality and good practice	15%	Readable naming, clear structure, appropriate functions and classes, useful docstrings, and consistent formatting
Learning evidence and portfolio completion	10%	Completed lab notebooks, Cheat Sheet photos (Boxes 1–7), and an orderly record of progress
Total	**100%**	

Submission
